WORK EXPERIENCE

Full Stack Web Developer

Opecise

04/2022 - 08/2022

Opecise is a consultancy firm working majorly for startups to provide them with a fully developed environment before they enter into the corporate world. They offer various services like Website development, App development, Data analytics, Graphic designing and Video development to set up a professional interface for the new businesses to interact with their client base effectively.

Tasks

- I have developed a Billing Information page for the App using ReactJS and Tailwind CSS. Also I have successfully implemented user authentication.

Web Developer

Karo Startup

03/2022 - 04/2022

karoStartup is India's fastest hiring and internship platform

Tasks

- Throughout the internship, valuable experience in collaborative teamwork was gained, allowing for the refinement of skills in UI development.

Full Stack Web Developer

Null Class

02/2023 - 05/2023

This platform offers students real-life projects that enhance their skills and provide practical experience, preparing them for real-world job opportunities. By engaging in these projects, students gain valuable hands-on experience in applying their technical knowledge to solve real-world challenges.

Tasks

- Having developed multiple projects, such as a code editor and a chat application, utilizing ReactJS, my technical proficiency and expertise in front-end development are demonstrated through these endeavors.

PERSONAL PROJECTS

Code Editor

- This application serves as a code editor, allowing users to write and edit code using HTML, CSS, and JavaScript. It provides a comprehensive environment where developers can seamlessly create, modify, and preview their code in real-time.
- The application was developed using a combination of ReactJs, Codemirror and Codemirror2.
- <https://code-editor01.netlify.app/>

Meme Generator

- A meme generator is a web-based application that provides users with the capability to create and personalize their own memes.
- The application was developed using a combination of ReactJs, CSS and flipimage Api.
- <https://meme-generator01.netlify.app>

Minion Speak

- I have implemented an API integration that enables English-to-Minion's language translation. This functionality allows for the conversion of English text into the Minion's language. The API seamlessly handles the translation process, leveraging its capabilities to provide accurate and efficient conversion.
- The application was developed using a combination of HTML, CSS, and JavaScript.
- <https://minion-speak-00.netlify.app/>

Portfolio

- My portfolio serves as a comprehensive display of my diverse skill set, which includes proficiency in various technologies. It demonstrates my abilities through a collection of projects that I have successfully developed using these skills.
- The application was developed using a combination of HTML, CSS, and JavaScript,
